FOREWORD

The International Conference on Social and Islamic Science 2023 (ICSIS-2023) was held on May 31st, 2023. The activities were carried out with collaboration, hard work, and smart work by the entire committee so that the activity was a success and received appreciation from within and outside the institution. Although we realize there are still many shortcomings in before and during the conference, everything is well-managed. All committee members did well what they were supposed to do. The event itself was conducted while the university was preparing to welcome new students intake.

It is with great pleasure that we present the proceedings of the International Conference on Social and Islamic Studies 2023. This online collection of 94 carefully selected papers and abstracts represents the culmination of rigorous research, insightful analyses, and a shared commitment to advancing knowledge in the fields of social studies and Islamic studies.

This conference has been a remarkable journey, bringing together scholars and researchers from diverse backgrounds and regions to explore the multifaceted relationship between society and Islamic principles. The depth and breadth of the papers presented here reflect the vitality of this field and the dedication of those who contributed their expertise.

We hope that these proceedings inspire further research, dialogue, and collaboration in the realms of social and Islamic studies. May the insights shared within these pages serve as valuable resources for academics, students, and anyone interested in deepening their understanding of the complex interplay between society and Islamic principles.

For this reason, on the behalf of the organizing committee, we are providing this proceedings for public. We hope, apart from being a documentation of the conference results, the papers contained in this proceeding can be useful for all readers.
